

Platform Documentation

An overview of the RGVertex AI workforce platform and the seven specialized agents that make it up — what each one does, and the outcomes it's built to deliver.

PLATFORM OVERVIEW

RGVertex gives every team in your company a dedicated AI agent — support, legal, finance, engineering, sales, hiring, and research — running on one secure, unified platform. Every agent works continuously, connects into the tools your teams already use, and operates within limits your team defines, routing anything outside those limits to a person.

THE SEVEN AGENTS

Customer Support Agent

Resolves customer queries around the clock, escalating only what truly needs a human.

- Cuts first-response time from hours to seconds
- Keeps support quality consistent across every channel
- Frees your team to focus on high-value conversations
- Learns from resolved tickets to improve over time

Legal & Compliance Agent

Reviews contracts and policies against your standards, flagging risk before it becomes a problem.

- Shortens contract review cycles significantly
- Reduces exposure to regulatory and contractual risk
- Keeps a consistent standard across every document
- Builds an auditable trail of every review decision

Finance Agent

Keeps books reconciled, flags anomalies, and turns raw numbers into decisions.

- Closes books faster with fewer manual corrections
- Flags unusual transactions before they compound
- Standardizes reporting across teams and entities
- Frees finance teams from repetitive reconciliation work

Tech & DevOps Agent

Watches your systems, triages incidents, and keeps releases moving safely.

- Shortens incident response and resolution time
- Reduces noise so engineers see what actually matters
- Keeps deployment pipelines healthy and predictable
- Documents incidents automatically for later review

Lead Generation Agent

Finds, qualifies, and prioritizes prospects so your sales team opens with warm leads.

- Increases qualified pipeline without extra headcount
- Keeps CRM records complete and current
- Prioritizes outreach by genuine buying signal
- Shortens the path from first touch to first call

HR & Hiring Agent

Screens candidates, schedules interviews, and keeps every hiring step moving.

- Cuts time-to-hire across every open role
- Keeps candidate communication timely and consistent
- Surfaces the strongest candidates faster
- Reduces administrative load on hiring teams

Market Research Agent

Tracks markets, competitors, and trends, and turns them into a briefing you'll actually read.

- Keeps strategy grounded in current market reality
- Surfaces competitor moves as they happen
- Saves hours of manual research every week
- Delivers insight in a format leadership can use
